Connecting to NSF IT Administration VPN

1. Download the FortiClient VPN installation App from below link (Windows Version)
   https://links.fortinet.com/forticlient/win/vpnagent

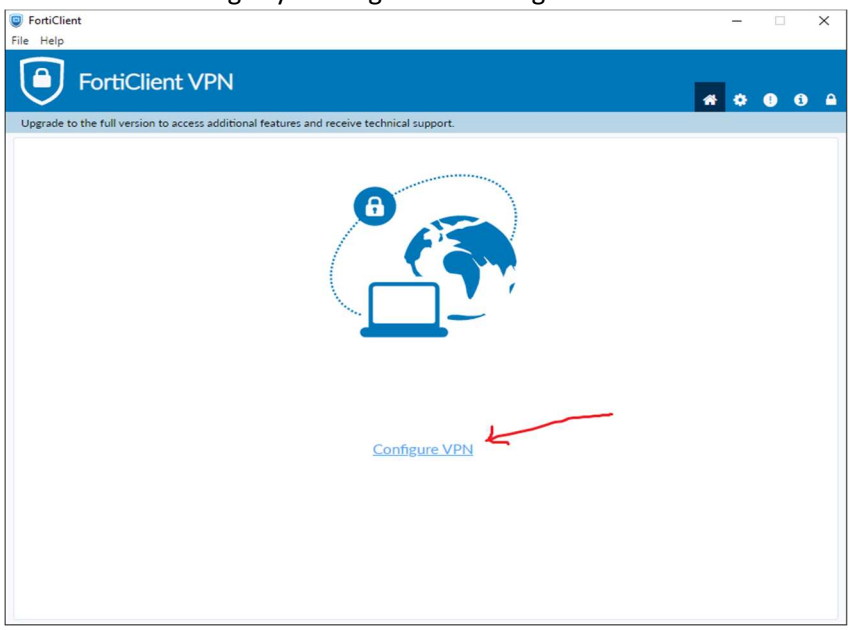

2. Install the Downloaded App by clicking on the License Agreement tick box

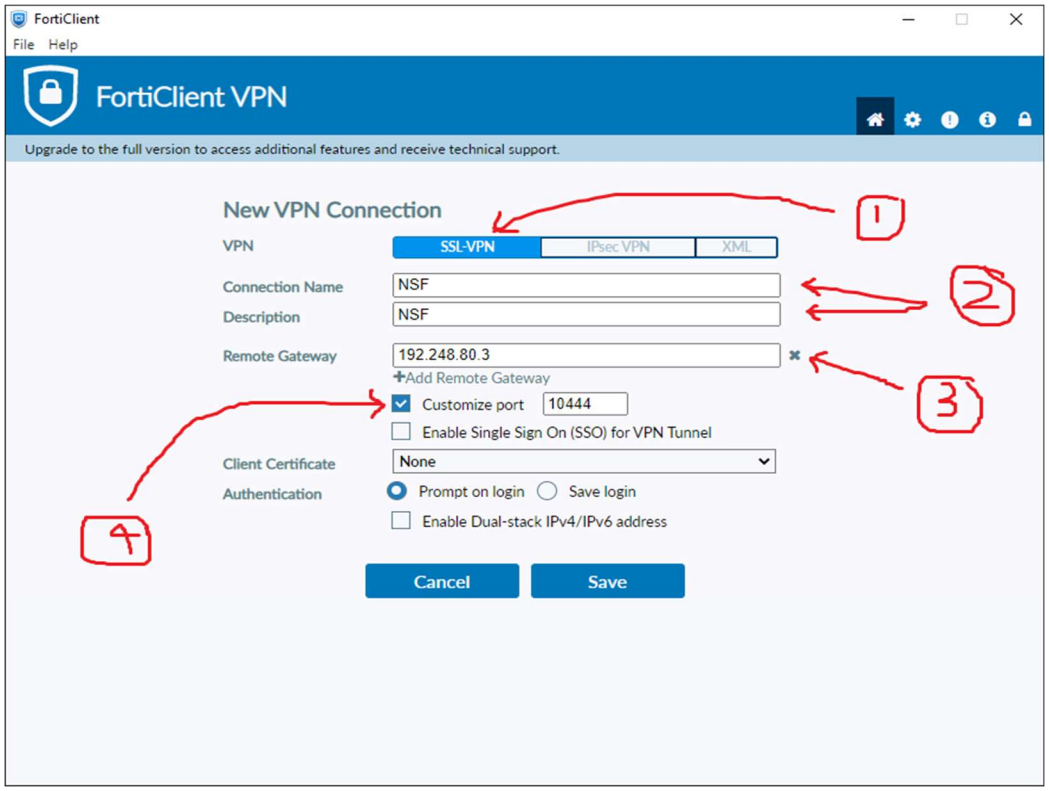

3. Tick the acknowledge box and press “I Accept” to continue

4. Provide VPN settings by clicking on the configuration link

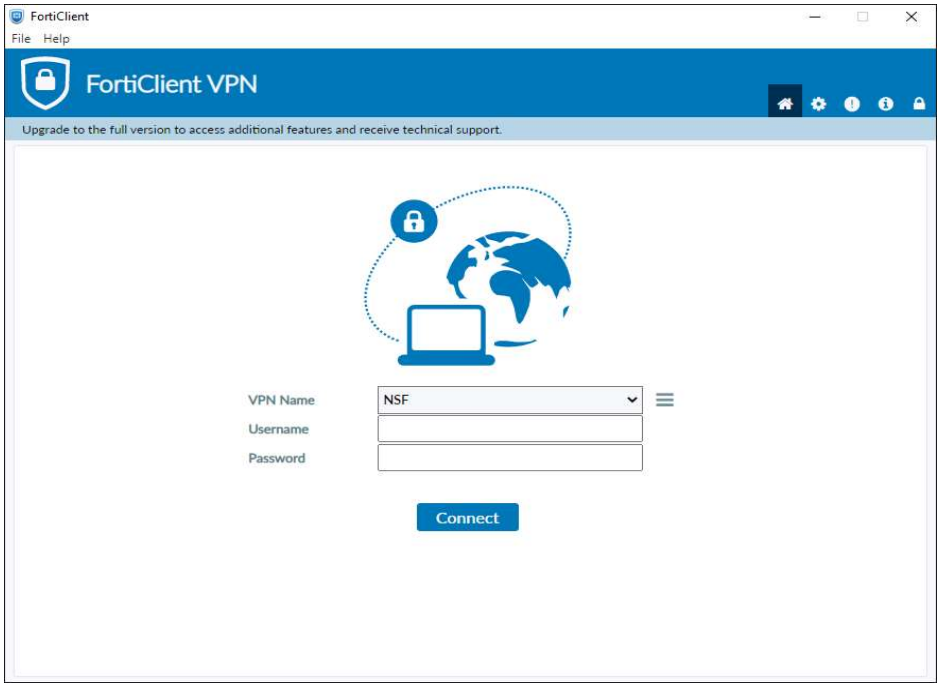

5. NSF VPN settings are as follows;

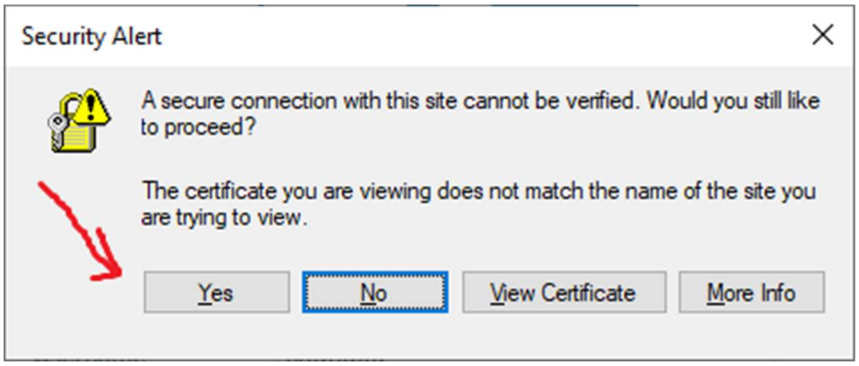

1. Select “SSL-VPN” as VPN
2. Given the “Connection Name” and Description” as your wish.
3. Type the IP Address 192.248.80.3 as “Remote Gateway”
4. Tick On the “Customize Port” and type 10444 as port number.
   Save settings to complete.

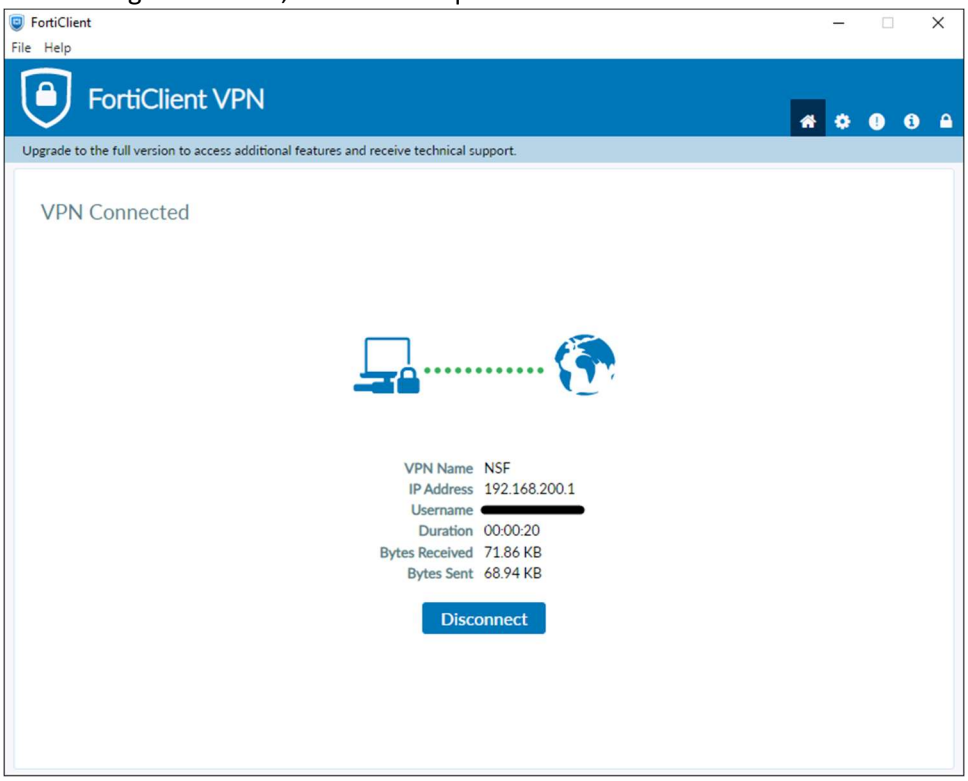

6. Double click on the FortiClient VPN Icon and start the VPN connection. Click on the “Connect” button giving username and password.

7. You will be prompted for a security warning. Simply click the “Yes” button to proceed.

8. The status windows will display connection statistics. Click on the “Disconnect” button to terminate the existing connection, whenever required.

Note : You successful logins and time duration will be recorded for security purpose.
